Education

University of Delhi

March-2025

Bachelor of commerce (GPA: 5.6)

Delhi, India

- **Relevant Coursework:** Business Development, Account handling, Cyber security, Management, Tax related

Ducat

Apr-2024

Professional Certification in Full-Stack Web Development

Delhi, India

- **Frontend Technologies :** HTML, CSS, JavaScript, React.js
Building responsive layouts, dynamic forms, and interactive UIs
Using React Hooks and component-based architecture for scalable frontend apps
- **Backend Technologies :** Java, Firebase
Implementing user authentication, real-time databases, and secure data handling
Working with server-side logic and backend integration using Java and Firebase services

Projects

Invoice-Web-App | React.js + Firebase

- Developed a full-featured invoice management app using React.js, Firebase, and JavaScript
- Implemented user authentication with Firebase to secure access and manage user sessions
- Connected to Firebase Realtime Database to store and retrieve invoice data dynamically
- Enabled profile editing using React hooks and DOM manipulation for dynamic updates
- A feature to download invoices as PDF, improving usability and record-keeping
- Designed a clean, responsive UI with form validation and smooth user experience
- Focused on modular code structure and reusable components for scalability

Netflix-clone | React.js + Firebase + TMDB API

- Built a Netflix-style streaming interface using React.js and Firebase for authentication and user session management
- Integrated the TMDB API to fetch dynamic movie data including posters, titles, and descriptions
- Designed an attractive, responsive UI with smooth navigation and hover effects for a premium user experience
- Used React Hooks (useState, useEffect) for state management and API calls
- Implemented protected routes to restrict access to authenticated users
- Focused on clean component structure and reusable layout elements for scalability

Portfolio-Web-app | React.js + Tailwindcss + javascript + iFrames

- Designed and developed a responsive personal portfolio using React.js, TailwindCSS, and JavaScript
- Used iframe integration to add smooth motion effects and interactive sections, Focused on UI/UX clarity, mobile responsiveness, and fast performance, Structured code with reusable components and clean routing for scalability

E-commerce-Web | React.js + Firebase + Redux

- Designing and developing a full-featured ecommerce website with custom UI built from scratch using React.js and TailwindCSS
- Implemented user authentication and logical flow for login, signup, and protected routes using Firebase
- Building core features like product listings, cart management, and checkout flow with real-time data handling
- Integrated Razorpay payment gateway for secure transactions
- Focused on clean architecture, reusable components, and scalable frontend-backend integration

Technical Skills

Languages: HTML, css, Javascript

Technologies: Firebase (Authentication, Realtime Database), Java UI/UX: Responsive Design, Form Validation, DOM Manipulation, Motion Effects (iframe)

Concepts: Skilled in Responsive Web Design and Mobile-First Layouts to ensure seamless user experience across devices. Experienced in Component-Based Architecture with React.js, building scalable and maintainable frontend applications. Proficient in implementing Authentication Flows and Protected Routes for secure access control. Comfortable with API Integration and Data Fetching to connect dynamic content and third-party services. Hands-on with Realtime Database Operations using Firebase for storing, retrieving, and syncing data efficiently.
